

7500kg Ramps @ 3.6m long

Sku: 200/360

The 7500kg ramps are the largest standard ramps in the Heavy Industrial range. Perfect for loading excavators, tractors, and other heavy machinery onto your truck. All Hyway Ramps are made from high tensile aluminium, produced right here in New Zealand!

Specifications

Length: 3600mm. Suitable for deck heights between 1200mm - 1300mm

Capacity: 7500kg (axle load across the pair)

Weight: 68kg each

A: 730mm

B: 600mm

C: 200mm

D: 60mm

The details

All Hyway Ramps have specially developed components to achieve a balance of strength, weight and cost.

Headplate: The 200/360 ramps have a unique headplate design. Pictured is the right-hand ramp. This cut-out, allows you to load the full width of your truck deck.

We recommend using the four steel pins supplied to secure the ramps to your deck through the headplate. Use two pins per ramp.

Capacity: These ramps are rated for a 7500kg axle load rating across the pair. The rated capacity must exceed the heaviest axle or concentration of load.

An excavator or tracked machine distributes it's weight along the length of it's tracks. However, a wheeled machine may have an uneven weight distribution between axles.

Rungs: High tensile aluminium extrusions. 600mm wide, set down 60mm into the side beams. They have two ribs on the top surface, designed for superior traction.

Important tip: Don't let your tracks or tyres touch the side beams when loading/unloading your machinery. If your tyres or tracks are wide, let us know and we'll build you a ramp to suit your requirement.

We also specialise in custom builds. If there's any specification that doesn't quite suit, talk to us and we'll help you out.

Designed and Manufactured here in New Zealand
