

200 SERIES

7.5T RAMPS AT 3.6M LONG

SPECIFICATIONS

CAPACITY: 7500kg per pair

LENGTH: 3600mm

WIDTH: 730mm overall

WEIGHT: 68kg each

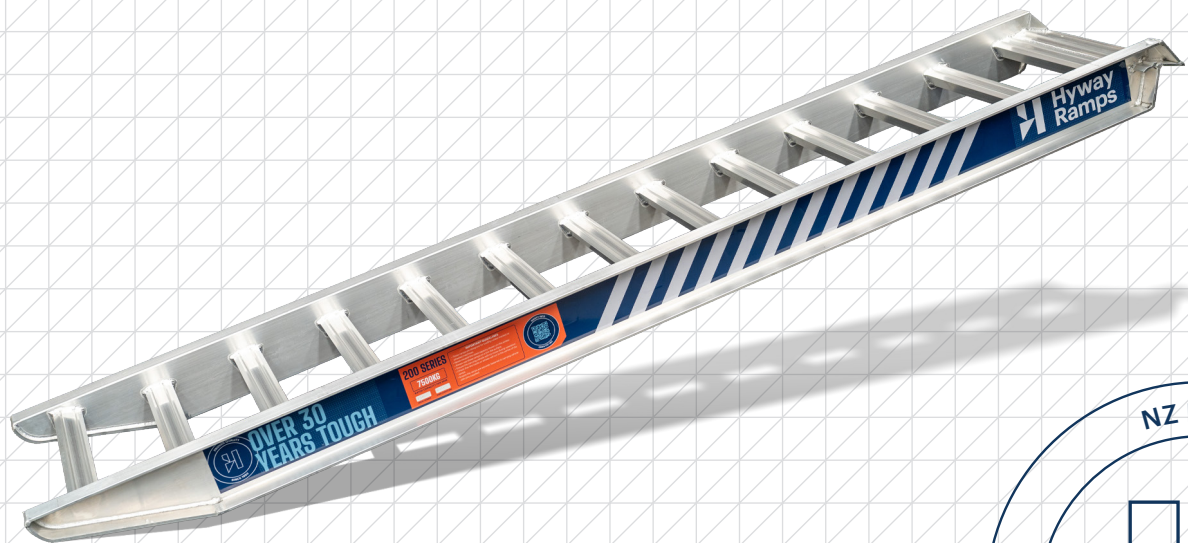

DECK HEIGHT RANGE: 1000mm - 1300mm

SKU: 200/360

OVERVIEW

The 7500kg ramps are the largest standard ramps in the Heavy Industrial Range.

Perfect for loading excavators, tractors and other heavy machinery onto your truck or trailer. All Hyway ramps are made from high tensile aluminium, produced right here in New Zealand.

THE FEATURES

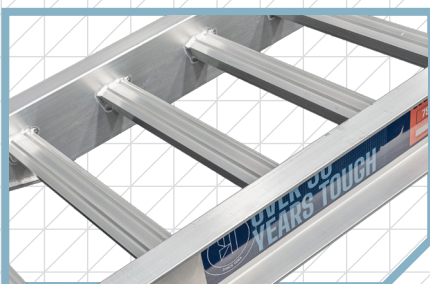

CAPACITY

These ramps are rated for 7500kg **axle load** rating across the pair. The rated capacity must exceed the heaviest axle of the machine you are loading.

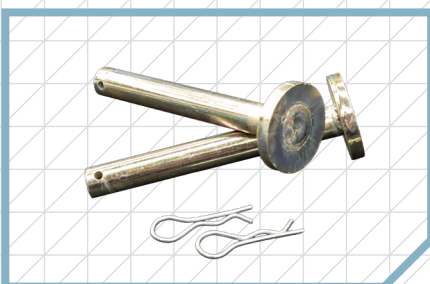

HEADPLATE

All our Heavy Industrial ramps have a unique headplate design. Our "cut out" design gives you the ability to use the full width of the deck to load and unload your machinery.

RUNGS

Each rung is made out of high tensile aluminium extrusions produced right here in New Zealand. These 7500kg ramps have rungs 600mm wide, which are set down 60mm into the side beams. They have two ribs on the top surface, designed for superior traction.

SECURING PINS

We recommend using the steel pins supplied, to secure the ramps to your deck through the headplate. This will prevent the ramps from creeping during loading and unloading.
