THE FEATURES

100 SERIES
1500KG

RATED CAPACITY PER PAIR

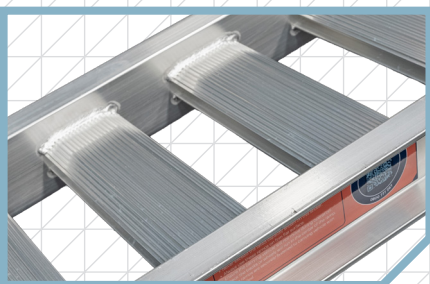

CAPACITY

These ramps are rated for 1500kg **axle load** rating across the pair. The rated capacity must exceed the heaviest axle of the machine you are loading.

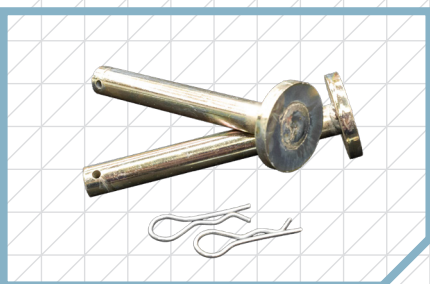

HEADPLATE

The 1500kg ramps have a unique headplate, measuring 90mm which sits on the back of your truck deck. The headplate is positioned for a 20° loading gradient.

RUNGS

Each rung is made out of high tensile aluminium extrusions produced right here in New Zealand. These 1500kg ramps have rungs 300mm wide, which are set down 30mm into the side beams. They have a serrated top surface, designed for superior traction.

SECURING PINS

We recommend using the steel pins supplied, to secure the ramps to your deck through the headplate. This will prevent the ramps from creeping during loading and unloading.
